

# Optional Service: Two-Factor Authentication

*At the request of several agencies seeking two-factor authentication functionality when logging into TitleDesktop, Accu-Title has paired with Duo, an independent provider of two-factor authentication services.*

**Duo's Trusted Access solution ensures only Trusted Users and Trusted Devices can access protected applications.**

We verify the identity of your users and the health of their devices before they connect to the applications you want them to access. We're more than a security company. We're a Trusted Access company.

## What is Two-Factor Authentication (2FA)?

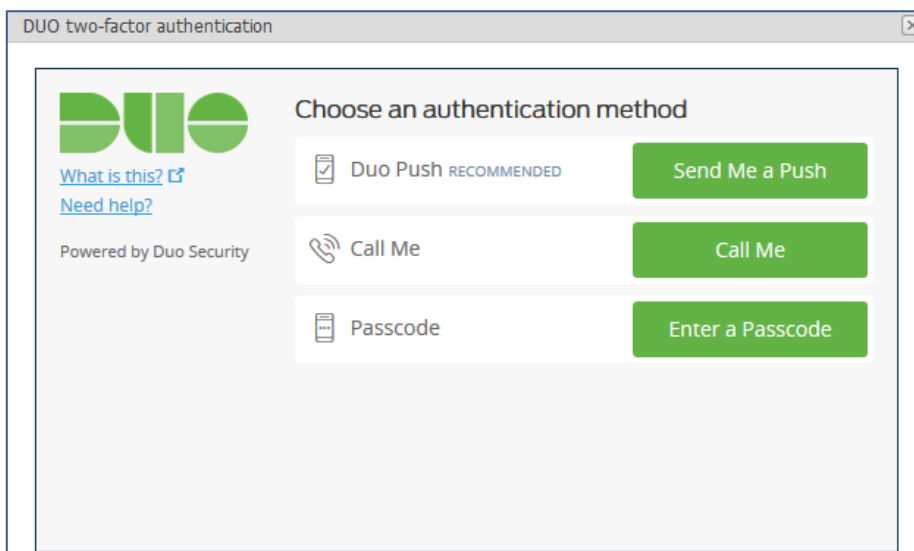

Two-factor authentication (2FA) strengthens access security by requiring two methods (also referred to as factors) to verify your identity. These factors can include something you know - like a username and password, plus something you have - like a smartphone app to approve authentication requests.

2FA protects against phishing, social engineering and password brute-force attacks and secures your logins from attackers exploiting weak or stolen credentials.

About 63% of confirmed data breaches involved weak, default or stolen passwords.

When this optional service is enabled, users will receive on-screen notice (pictured below) AND an authentication notice on their smart phone via DuoMobile where they can accept or decline the login request to access TitleDesktop. (Apps are available for iPhone and Android phones in the AppStore and GooglePlay.) Authentication can be achieved by text, by call or via Duo Push (pictured right).

This optional service may be enabled on a per-user basis, at the discretion of the customer. Clients will only be invoiced for those users that have Duo enabled. Please contact Pete Schultes in our Client Services Department for pricing and enabling service. Pete can be reached via email [Pete@accutitle.com](mailto:Pete@accutitle.com) or by phone at 877-354-1170 x127.
